Q2: CLO1+CLO2

Marks [2*4=8]

Answer the following questions shortly:

- Explain why context is important when evaluating usability.
- An elderly person still uses a basic keypad phone instead of a smartphone. Classify the user type and explain your reasoning.
- A persona named "Ali" is a first-year student with high anxiety about exams. Suggest features that your app design include based on this persona?
- Explain the significance of user-centered design in the development of modern interfaces.

Q3: CLO2

Marks [5+5=10]

Banking software's in Pakistan need to connect with a central server via the internet at each transaction request. That is why, in case of an internet or communication failure, the system of the bank branch cannot process any transactions and valuable time is lost.

- Suggest five users of the existing system, who should be consulted for the requirements of the new system and why? (Just 1 line)
- List the questions (main part) you would prepare to interview the aforementioned users (3 from each), for any two users.

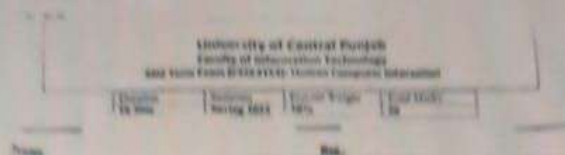

CS CamScanner

Q4: CLO1

Marks[5+2]

Evaluate the following design if you find any inconsistency or bad designing then enlist it (any five) and justify your points with reason.

INSTRUCTIONS
1. This is a CLASSIFIED EXAM. NO CLASSIFIED MATERIALS can be taken out of this EXAM.
2. Check the questions paper with your answer sheet.
3. There are a total of 80 questions, and 80 printed sides of a page.

- Q1. Multiple Choice Questions (Choose Answer as Answer Sheet)
- The four main components for an interaction between user and system are:
 - input, task, output, human
 - input, task, output, human
 - input, task, output, human
 - input, task, output, human
 - The factors in the physical environment that directly affect the quality of the interaction and the user's performance are:
 - Physical position, View
 - Temperature, lighting
 - Noise
 - All of the above
 - What could be some interface styles between computer and human?
 - Command line interface (CLI)
 - Graphical user interface (GUI)
 - Point and click
 - All of the above
 - Which of the following is one of the constraints that designers of an interaction system can face?
 - Privacy
 - Legal and safety
 - For a product to be successful, it must be:
 - Useful by humans
 - Used by humans
 - Useful by humans
 - Used by humans
 - None of these
 - Which of the following statement is true regarding personas?
 - A primary persona needs their own interface
 - Multiple secondary personas are combined into primary persona
 - A persona represents the elastic user
 - None of the above
 - A computer expert produces a solution with HCI which is very efficient in computer resources, low command-lines. Which of the following is most likely to be the result when the system is designed?
 - Most staff will want to become computer experts
 - All staff will enjoy using it after mastering the command lines
 - It will be welcomed by all staff
 - Most staff will not want to use the system
 - _____ refers to how good a system is doing what it is supposed to do.
 - Learnability
 - Usefulness

- Q2. Answer the following questions shortly.
- Explain the difference between social responsibility and practical responsibility of a system?
 - Why human computer interaction is important in software design?
 - Explain briefly why personas are useful for design?
 - What are the main problems with respect to the design and development of an interaction model?
- Q3. A modern high-end hotel in Pakistan has launched a Sandwich Making and Delivery System (SMDS) to test and regularly monitor service productivity at any hour of the day. The hotel also has an automated delivery system as part of SMDS that will take the completed sandwich to a specified room. The hotel must target foreigners who travel to Pakistan for their business or leisure trips. However, a few people in nearby Pakistani community who can afford high-end services are also welcomed.
- Identify target market of SMDS system.
 - Identify user classes, and mention the type of each class (i.e., primary, or secondary).
 - Write one persona for some primary user class you have identified in task 1.
 - Write a scenario describing how a guest order a sandwich using your interface.
